

RUSTY TOKEN AI (RUSTY)

The First AI Meme Token on Linea

Help build the future. **Let's Celebrate!**
Let's Create!

@RustyTokenAI

Executive Summary

Rusty Token AI (RUSTY) is a meme token that combines the fun of crypto culture with the transformative power of artificial intelligence. Built on the Linea blockchain, RUSTY enables mini-games, educational content, and art galleries, while rewarding community members through staking and contests.

Market Context

Meme tokens like Dogecoin and SHIB have proven that community-driven projects can achieve global attention. At the same time, AI is one of the fastest growing fields of technology. Rusty Token AI sits at the intersection of these two megatrends, harnessing the humor of memes and the innovation of AI. Linea blockchain provides the foundation with its zkEVM scalability, low fees, and Ethereum alignment.

Vision & Mission

Rusty Token AI is more than just a meme token — it's a cultural movement designed to push the boundaries of AI and blockchain innovation while remaining fun and community-driven. Our mission is to:

- Celebrate AI culture through memes, art, and games.
- Research and develop AI agents that interact with the community, providing educational and entertaining experiences.
- Build AI-powered games and applications that reward players with RUSTY tokens.
- Promote AI-generated art and creativity within Web3.
- Grow an open ecosystem where developers and creators can use RUSTY as a foundation for innovation on Linea.

Research & Development

Rusty Token AI is committed to exploring the frontier of decentralized AI. The R&D initiative focuses on:

- AI Agents: Building intelligent bots and assistants that interact with users in games, education, and community chats.
- AI Games: Developing blockchain-integrated, AI-enhanced games where outcomes and storylines adapt dynamically.
- AI Applications: Creating decentralized applications powered by machine learning and AI APIs.
- AI Art: Researching new tools for generative art and integrating AI-driven creativity into the Rusty Art Gallery.

This commitment ensures RUSTY evolves beyond a token into a true hub of AI innovation on Linea.

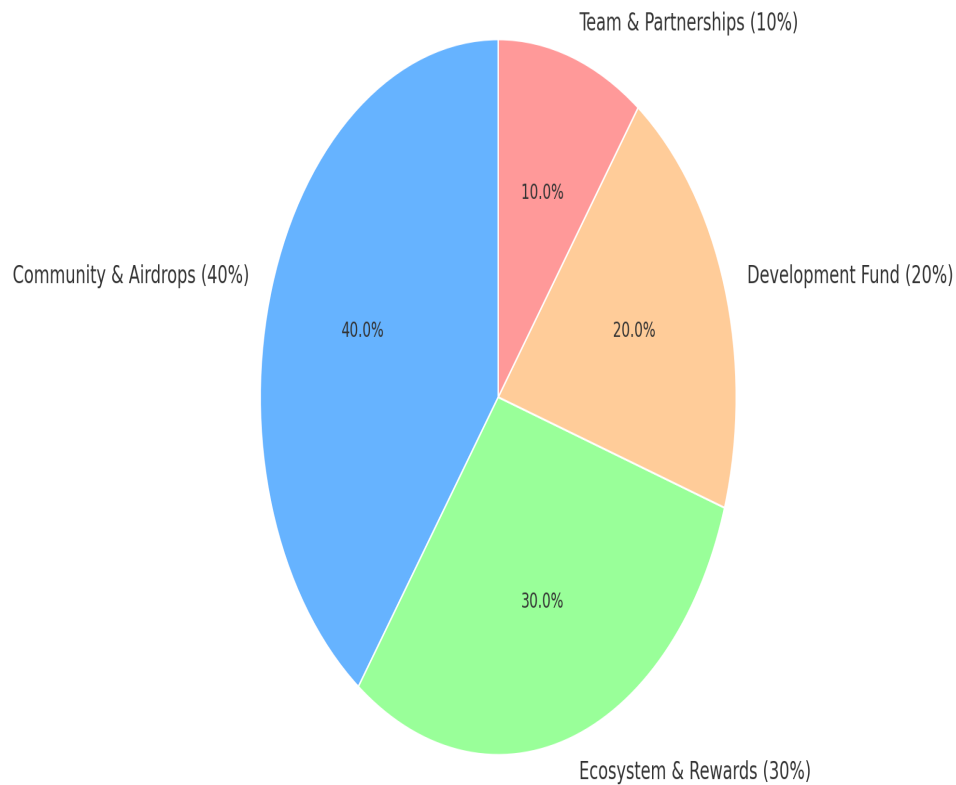

Technology & Security

RUSTY is an ERC-20 token deployed on Linea. The staking contract requires a minimum of 100,000 tokens and caps participation at 1,000,000 tokens per wallet. Rewards are distributed proportionally to staked amounts and duration. Smart contract audits and bug bounty programs will ensure transparency and security. Future plans include NFT integration and DAO voting contracts.

Tokenomics

Total Supply: 1,000,000,000 RUSTY - 40% Community & Airdrops (400M) - 30% Ecosystem & Rewards (300M) - 20% Development Fund (200M) - 10% Team & Partnerships (100M) Team allocations will be locked for 12 months to ensure long-term alignment. Initial liquidity will be provided on DEXs, with CEX listings planned for later phases. Deflationary mechanics such as token burns during contests or governance events may be introduced.

RUSTY Tokenomics Distribution

Stake Amount	Staking Duration	Estimated Rewards (APY Example)
100,000 RUSTY	1 month	500 RUSTY
500,000 RUSTY	6 months	20,000 RUSTY
1,000,000 RUSTY	12 months	60,000 RUSTY

Utility

- Mini-games with play-to-earn mechanics. - Educational course access using tokens. - Governance voting on ecosystem decisions. - Staking for rewards. - NFT collectibles and gallery integration in future phases.

Roadmap

Phase 1 – Foundation: - Token launch on Linea - Website and community channels live - First Rusty mini-game (Blackjack) release
Phase 2 – Expansion: - Rusty Knowledge Courses launched - Rusty Art Gallery debut - Leaderboard competitions & meme contests
Phase 3 – Growth: - Launch staking contracts with rewards - AI Agent prototype for Telegram/Discord - First AI-powered community-driven contest - Strategic ecosystem partnerships
Phase 4 – Governance & R&D; Integration: - Community DAO voting system live - Treasury

transparency tools released - AI Game beta with adaptive storylines - AI Art engine integrated into Rusty Gallery Phase 5 – Beyond: - Rusty dApp marketplace for community-built apps - Cross-chain bridges for expanded access - Metaverse integration with Rusty avatars - Fully decentralized AI agents and tools - Global expansion of RUSTY as the mascot of AI on Linea

RUSTY Roadmap Timeline

Phase 1
Launch: Token deployment, website, mini-game

Phase 2
Expansion: Knowledge Courses, Art Gallery

Phase 3
Growth: Community contests, staking, partnerships

Phase 4
Governance: DAO voting, treasury, AI integrations

Phase 5
Beyond: Cross-chain bridges, metaverse, AI dApps

Governance & Community

RUSTY will transition to a DAO where token holders decide key ecosystem changes. Governance will be based on one-token-one-vote, with treasury transparency and public voting results. Meme contests, art competitions, and mini-games will further engage the community.

Partnerships & Ecosystem Growth

RUSTY seeks collaborations with AI projects, NFT artists, and Web3 innovators. Community-driven contests will highlight creativity while expanding partnerships into gaming, NFT marketplaces, and metaverse integrations.

Legal & Risk Disclaimer

RUSTY is a meme token and should not be viewed as an investment vehicle. Cryptocurrencies are volatile and speculative. The project makes no financial guarantees. Users must conduct their own research and understand regional regulations before participating.
